- Extensive design flexibility.
- Engineered to meet your needs.
- Economical and maintenance free.
- Easily adapted to most building sites.
- Sturdy wall and roof truss systems built for the north country.
- Excellent performance under high wind and snow conditions.
- A trusted local business serving thousands of satisfied customers for more than 35 years.

We keep our promises.

Because our reputation is on the line our building warranty is second to none. We promise superior workmanship, design, material selection, and construction technique that ensures your building will be worry free for years to come.

Built with the highest quality materials from the ground up, inside and out, delivering years of steady performance for you.

32 x 40 x 10

30 x 48 x 10

- Thick insulated walls and ceilings provide energy savings year 'round to help control utility costs.
- Maintenance free exteriors, including doors and windows, let you spend time on more important projects.

Elite Series Steel
Panels using G100 galvanized. Available in a variety of colors and trim packages.

Optional: Building wrap on the outside walls minimizes moisture and humidity penetration.

Super insulated building packages to meet or exceed energy standards.

- R19 to R25 Walls
- R40 to R50 Ceilings

Optional: Trim including stone, brick, wood, Dryvit or steel to make your building unique.

Durable overhead doors are matched with a tough and powerful lift system.

Optional: Gutter and downspout helps move water away from the building.

Maintenance free insulated doors and windows are available in a wide variety of styles.

Add a marquee awning, dormers or covered vestibule to make your building stand out.

- Unique finger jointed columns, used in all Foltz Buildings, are 30% stronger vs. field spliced/nailed columns.
- Each 3-ply column is continuous from base to top of roof truss for stronger end walls.
- Only select grade Machine-Stress Rated lumber is used. It is stronger and has fewer defects than standard grade lumber used by other builders.
- An engineered roof truss system that meets or exceeds all State building code requirements.
